

Protective Door Bolts BL and BS

Accessories for Safety Interlocking Devices

BL and BS Safety Door Bolts for Safety Interlocking Devices S10 and L50.

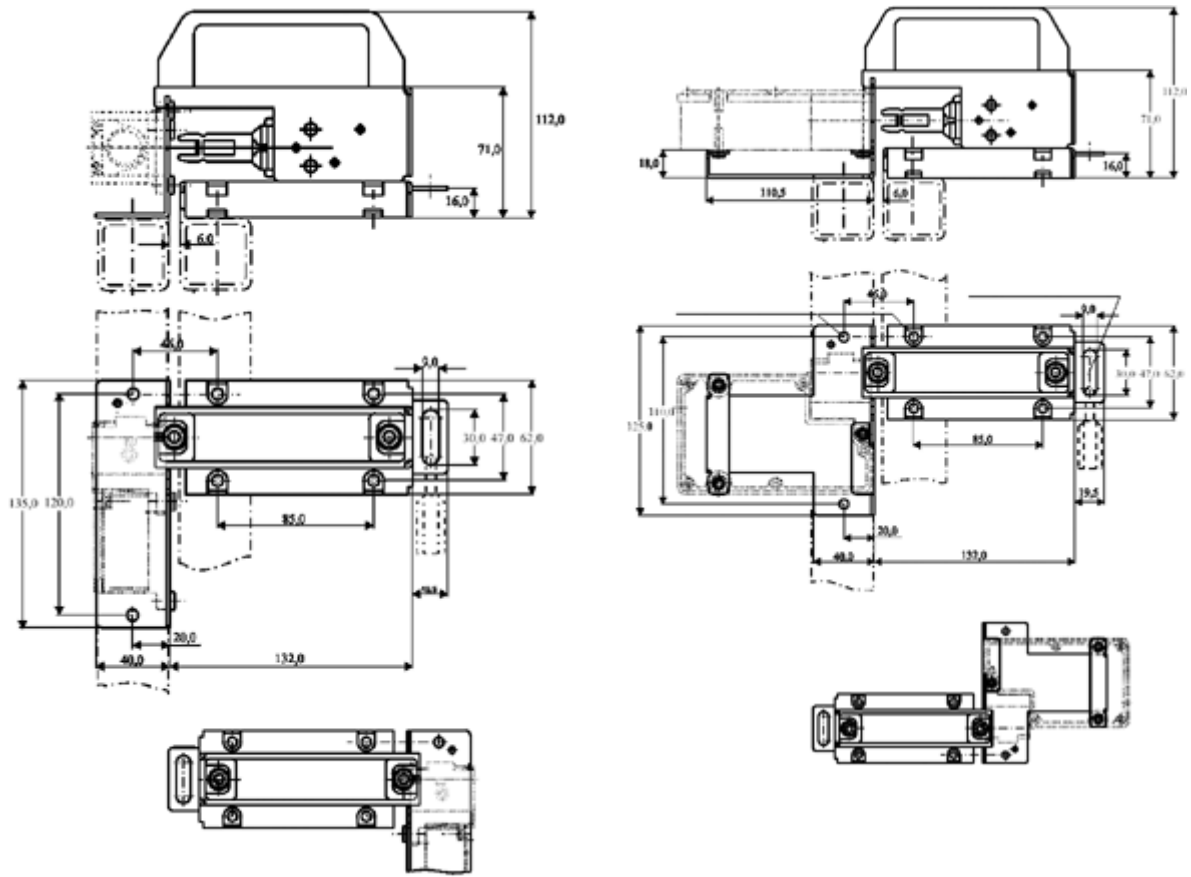

The Series BL and BS safety door bolts with integrated telescope actuators serve as a prefabricated mounting support and eliminate the need for the user to undertake mechanical adaptive measures. At the same time, the safety door bolts act as an end stop and protect the interlocking devices from sustaining damage.

Advantages

- Allows quick and proper mounting of safety interlocking devices
- Simple mounting on aluminum profiles, square pipes and machine cover panels
- Universally suitable for right-stopped or left-stopped safety doors
- Mechanical end stop function protects the interlocking devices
- Prevents the machinery from starting up inadvertently due to accidental closing
- Suitable for safety interlocking devices Series S10 and L50
